DARE PER SALVAGUARDARE

A specially developed App  
and made available on all app stores.

An easy way to

- save money and reduce your ecological footprint
- feel part of a community that shares your values.

For a cultural change of children youth and adults to saving and international solidarity in a systemic perspective and of nature-man interdependence planetary .

Energy wastage influences climate change, the effects of which have an impact on the environment and people, causing natural disasters, poverty and migration.

EcoGive was born from the project GIVE FOR SAVEGUARDING THE ENVIRONMENT.

At the heart of the project is the pact of saving energy and protecting environment. Everyone commits to do small but many acts of energy saving and care of the environment, so that we can compose a worldwide network of interdependent acts.

Acts of energy savings are carried out in 5 areas:

electricity, water, gas, recycling/reuse and food waste. Everyone can register by choosing from the 5 lists on the dashboard of the app.

Three counters show energy savings (CO<sub>2</sub>, kWh, water) that can be achieved with each act. Even small acts of everyday life can make a difference.

When you register, you can create a group or join a group of colleagues, friends, classmates, whom already have a code. You can choose a solidarity project from the app, or you can propose one, according to the 3 development goals of the United Nations\* in which our Project is focused on.

Every act of energy saving also saves money. Every month you will receive by email a list of the acts completed and you are invited to donate the savings to the chosen solidarity project.

In this way, our commitment for the environment, each act of energy saving and environmental protection is transformed into an act of justice and solidarity in a worldwide perspective.

The EcoGive logo is a white rounded square tilted at an angle, containing the word "EcoGive" in a green, sans-serif font.
